SUBJECT INDEX

A.C. anodizing
A.C. anodizing of aluminium alloys, 309
Acid corrosion
study of the inhibition of the acid corrosion of steel by Auger electron spectroscopy, 199
Acoustic emission
acoustic emission measurements during the electrodeposition of Cr layers on steel, 243
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
Additives
Review: some mechanisms of action of additives in electrodeposition processes, 415
Adsorption
the role of the hydration of cations in their adsorption on oxides, 317
Aluminide coatings
transmission electron microscopy investigation of the transient oxides formed on the aluminide coating on Inconel 625 superalloy, 207
Aluminium
A.C. anodizing of aluminium alloys, 309
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
Ammonia
anodic behaviour of cobalt ferrous ferrites in ammonia-containing solutions, 191
Anodes
effect of the interface properties on the kinetics of the hydrogen electrode reaction II: the anodic region, 389
Anodic behaviour
anodic behaviour of cobalt ferrous ferrites in ammonia-containing solutions, 191
Anodic oxide films
on the stability of anodic oxide films formed on Mb in various aqueous solutions, 365
Auger electron spectroscopy
study of the inhibition of the acid corrosion of steel by Auger electron spectroscopy, 199

Bend testing
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
Borided layers
the effect of C, Cr and Ni on the hardness of borided layers, 157
Brasses
the dezincification of free-machining brasses in sea water, 289

Carbon
the effect of C, Cr and Ni on the hardness of borided layers, 157
Cathodes
effect of the interface properties on the kinetics of the hydrogen electrode reaction I: the cathodic region, 375
Cations
the role of the hydration of cations in their adsorption on oxides, 317
Ceramic
particulate erosion of plasma-sprayed porous ceramic, 41
the behavior of ceramic thermal barrier coatings on diesel engine combustion zone components, 51
Cerium
X-ray photoelectron spectroscopy studies of valence states of cerium and uranium in SYNROC C, 333
Chromium
acoustic emission measurements during the electrodeposition of Cr layers on steel, 243

© Elsevier Sequoia/Printed in The Netherlands

electropolishing of Fe–Cr alloys in phosphoric acid–sulphuric acid electrolytes, 265
the effect of C, Cr and Ni on the hardness of borided layers, 157
Clay
electrochemical reduction of ions incorporated in a clay matrix, 215
Coatings
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
characterization of electroless Ni and Cu coatings: an X-ray photoelectron spectroscopy study, 137
improved coatings by isodynamic compression, 83
Cobalt
apparent equilibrium codeposition of Ni–Co alloy powder from dilute sulphate baths, 183
preparation and properties of amorphous Co–P and Co–Ni–P films, 131
Cobalt ferrous ferrites
anodic behaviour of cobalt ferrous ferrites in ammonia-containing solutions, 191
Copper
characterization of electroless Ni and Cu coatings: an X-ray photoelectron spectroscopy study, 137
electrochemical studies of the corrosion of some Cu–Zn alloys in organic acids, 277
properties of non-aqueous solutions of $Cu(CF_3SO_3)_2$, 147
Corrosion
corrosion and oxidation resistance of plasma-sprayed WSi_2 coatings, 107
electrochemical studies of the corrosion of some Cu–Zn alloys in organic acids, 277
Crystal modification
effect of heavy metal additions and crystal modification on the zinc phosphating of electrogalvanized steel sheet, 171

Dezincification
the dezincification of free-machining brasses in sea water, 289
Diesel engines
methods for thermomechanical analysis of thermal barrier coatings in diesel engines, 63
the behavior of ceramic thermal barrier coatings on diesel engine combustion zone components, 51
Double-layer capacity
influence of the double-layer capacity in periodically changing rate metal electrodeposition, 405

Electrochemical reduction
electrochemical reduction of ions incorporated in a clay matrix, 215
Electrochemical studies
electrochemical studies of the corrosion of some Cu–Zn alloys in organic acids, 277
Electrodeposition
acoustic emission measurements during the electrodeposition of Cr layers on steel, 243
a metastable phase in electrodeposited Ag–Ge alloys, 401
influence of the double-layer capacity in periodically changing rate metal electrodeposition, 405
Review: some mechanisms of action of additives in electrodeposition processes, 415
Electrogalvanized steel sheet
effect of heavy metal additions and crystal modification on the zinc phosphating of electrogalvanized steel sheet, 171
Electrolytic alloys
the influence of type and orientation of single-crystal substrates on the structure of electrolytic alloys, 253
Electropolishing
electropolishing of Fe–Cr alloys in phosphoric acid–sulphuric acid electrolytes, 265
Equilibrium codeposition
apparent equilibrium codeposition of Ni–Co alloy powder from dilute sulphate baths, 183
Erosion
particulate erosion of plasma-sprayed porous ceramic, 41

Ferrous metal electrodes
study on ferrous metal electrodes in nitric acid solutions, 355

Fracture
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
Films
preparation and properties of amorphous Co–P and Co–Ni–P films, 131

Gallium phosphide
influence of substrate temperature on the preparation of GaP thin films, 327
Gas turbine blades
behavior of thermal barrier coatings for advanced gas turbine blades, 13
Germanium
a metastable phase in electrodeposited Ag–Ge alloys, 401

Hardness
the effect of C, Cr and Ni on the hardness of borided layers, 157
Hardsurfacing alloys
underwater plasma spraying of hardsurfacing alloys, 73
Heavy metal additions
effect of heavy metal additions and crystal modification on the zinc phosphating of electrogalvanized steel sheet, 171
Hydration
the role of the hydration of cations in their adsorption on oxides, 317
Hydrogen electrode reaction
effect of the interface properties on the kinetics of the hydrogen electrode reaction I: the cathodic region, 375
effect of the interface properties on the kinetics of the hydrogen electrode reaction II: the anodic region, 389

Inconel 625 superalloy
transmission electron microscopy investigation of the transient oxides formed on the aluminide coating on Inconel 625 superalloy, 207
Inhibition
study of the inhibition of the acid corrosion of steel by Auger electron spectroscopy, 199
Interface properties
effect of the interface properties on the kinetics of the hydrogen electrode reaction I: the cathodic region, 375
effect of the interface properties on the kinetics of the hydrogen electrode reaction II: the anodic region, 389
Iron
electropolishing of Fe–Cr alloys in phosphoric acid–sulphuric acid electrolytes, 265
Isodynamic compression
improved coatings by isodynamic compression, 83

Kinetics
effect of the interface properties on the kinetics of the hydrogen electrode reaction I: the cathodic region, 375
effect of the interface properties on the kinetics of the hydrogen electrode reaction II: the anodic region, 389

Metastable phase
a metastable phase in electrodeposited Ag–Ge alloys, 401
Molybdenum
on the stability of anodic oxide films formed on Mb in various aqueous solutions, 365
Morphologies
coating morphologies of supersonic plasma-sprayed stabilized zirconium oxides, 29

Nickel
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
apparent equilibrium codeposition of Ni–Co alloy powder from dilute sulphate baths, 183
characterization of electroless Ni and Cu coatings: an X-ray photoelectron spectroscopy study, 137
preparation and properties of amorphous Co–P and Co–Ni–P films, 131
the effect of C, Cr and Ni on the hardness of borided layers, 157

Nitric acid
study on ferrous metal electrodes in nitric acid solutions, 355
Non-aqueous solutions
properties of non-aqueous solutions of $Cu(CF_3SO_3)_2$, 147

Organic acids
electrochemical studies of the corrosion of some Cu–Zn alloys in organic acids, 277
Oxidation
corrosion and oxidation resistance of plasma-sprayed WSi_2 coatings, 107
Oxides
the role of the hydration of cations in their adsorption on oxides, 317
transmission electron microscopy investigation of the transient oxides formed on the aluminide coating on Inconel 625 superalloy, 207

Phosphoric acid
electropolishing of Fe–Cr alloys in phosphoric acid–sulphuric acid electrolytes, 265
preparation and properties of amorphous Co–P and Co–Ni–P films, 131
Plasma nitriding
a study of plasma-nitrided AISI type 316 stainless steel, 343
Plasma-sprayed coatings
acoustic emission research on the fracture behaviour of plasma-sprayed Ni–Al coatings during bend testing, 115
coating morphologies of supersonic plasma-sprayed stabilized zirconium oxides, 29
corrosion and oxidation resistance of plasma-sprayed WSi_2 coatings, 107
particulate erosion of plasma-sprayed porous ceramic, 41
Plasma spraying
underwater plasma spraying of hard-surfacing alloys, 73

Quality control
Technical note: production thermal spraying equipment and quality control considerations, 223

Sea water
the dezincification of free-machining brasses in sea water, 289
Silicon
corrosion and oxidation resistance of plasma-sprayed WSi_2 coatings, 107
Silver
a metastable phase in electrodeposited Ag–Ge alloys, 401
Single-crystal substrates
the influence of type and orientation of single-crystal substrates on the structure of electrolytic alloys, 253
Steel
acoustic emission measurements during the electrodeposition of Cr layers on steel, 243
a study of plasma-nitrided AISI type 316 stainless steel, 343
on the stability of anodic oxide films formed on Mb in various aqueous solutions, 365
study of the inhibition of the acid corrosion of steel by Auger electron spectroscopy, 199
Substrate temperature
influence of substrate temperature on the preparation of GaP thin films, 327
Sulphate baths
apparent equilibrium codeposition of Ni–Co alloy powder from dilute sulphate baths, 183
Sulphuric acid
electropolishing of Fe–Cr alloys in phosphoric acid–sulphuric acid electrolytes, 265
SYNROC C
X-ray photoelectron spectroscopy studies of valence states of cerium and uranium in SYNROC C, 333

Thermal barrier coatings
behavior of thermal barrier coatings for advanced gas turbine blades, 13
current status of thermal barrier coatings — an overview, 1
methods for thermomechanical analysis of thermal barrier coatings in diesel engines, 63
the behavior of ceramic thermal barrier coatings on diesel engine combustion zone components, 51
Thermal spraying equipment
Technical note: production thermal spraying equipment and quality control considerations, 223
Thermal-spray powders
retesting thermal-spray powders, 95

Thermomechanical analysis
methods for thermomechanical analysis of thermal barrier coatings in diesel engines, 63
Thin films
influence of substrate temperature on the preparation of GaP thin films, 327
Transmission electron microscopy
transmission electron microscopy investigation of the transient oxides formed on the aluminide coating on Inconel 625 superalloy, 207
Tungsten
corrosion and oxidation resistance of plasma-sprayed WSi_2 coatings, 107

Uranium
X-ray photoelectron spectroscopy studies of valence states of cerium and uranium in SYNROC C, 333

Valence states
X-ray photoelectron spectroscopy studies of valence states of cerium and uranium in SYNROC C, 333

X-ray photoelectron spectroscopy
characterization of electroless Ni and Cu coatings: an X-ray photoelectron spectroscopy study, 137
X-ray photoelectron spectroscopy studies of valence states of cerium and uranium in SYNROC C, 333

Zinc
electrochemical studies of the corrosion of some Cu–Zn alloys in organic acids, 277
Zinc phosphating
effect of heavy metal additions and crystal modification on the zinc phosphating of electrogalvanized steel sheet, 171
Zirconium oxides
coating morphologies of supersonic plasma-sprayed stabilized zirconium oxides, 29
